

Vasile Grafu

Engineering Manager | Solutions Architect | Enterprise & AI Systems

Bucharest, Romania · +40 722 635 785 · vasilegrafu@gmail.com · linkedin.com/in/vasile-grafu-6a99369 · vasilegrafu.github.io

SUMMARY

Engineering leader with 20+ years in software — from game engines at Ubisoft to cloud platforms handling millions of requests a day, now building agentic AI systems. I combine hands-on development with leadership: coding, architecture, and decision-making while aligning teams across the company.

SKILLS

Leadership: Engineering Management, Team & Technical Leadership, Hiring & Mentoring, Agile/Scrum, Project Management (Prince2), Strategic Planning

Backend: C#, .NET, ASP.NET Core, Entity Framework, LINQ, Python, FastAPI, SQLAlchemy, Solution & Software Architecture, Framework Design

Frontend: JavaScript, ReactJS, HTML, CSS, SASS, Material UI

AI & ML: AI-Assisted Development, Agentic Architectures, LLM Orchestration, RAG, Prompt Engineering, MCP-style Tool Integration, TensorFlow, NumPy, Pandas

Cloud & Data: AWS (EC2, ECS, RDS, S3, CloudFormation), Docker, CI/CD, SQL Server, PostgreSQL, Database Design

Foundations: Data Structures & Algorithms, Mathematics, Probability, Machine Learning, Deep Learning

EXPERIENCE

Engineering Manager · nShift (formerly Consignor), Bucharest

Jan 2022 – Present

nShift is a global leader in parcel delivery management and multi-carrier shipping software. I lead the Webservices Team — one of the company's core teams — building web services that handle millions of requests per day for multiple business-critical applications.

- Lead and manage the team: clear goals, direction, and a motivated, effective group; recruit, onboard, and mentor engineers.
- Establish engineering processes and standards that improve collaboration, maintain quality, and accelerate delivery.
- Provide technical guidance: design reviews, complex problem-solving, and critical decisions on challenging topics.
- Hands-on in architecture and development: shared components, application structure, data flow, database design, and security.
- AWS Solution Architect: cloud environments and CI/CD pipelines. Scrum Master for the team's agile ceremonies.
- Building a large-scale internal conversational AI platform: agentic architecture combining LLMs with orchestration layers, RAG, structured prompt engineering, and MCP-style tool integration; domain-specific agents collaborate over a continuously updated ingestion and retrieval pipeline of internal documentation, APIs, and business data.

C# / .NET / ASP.NET Core · Python / FastAPI / SQLAlchemy · SQL Server / PostgreSQL · AWS (EC2, ECS, RDS, S3) · Docker · JavaScript / ReactJS / Material UI

Team Manager · Consignor, Bucharest

Jan 2017 – Jan 2022

Consignor, the largest supplier of transport-administration solutions in Scandinavia. Led two teams, combining Team Manager, Technical Lead, Project Manager (Prince2), and Software Developer roles as business demanded.

- Webservices Team: handled many millions of requests per day serving the client components of the Consignor business.
- Integration Team: brought Consignor functionality to major e-commerce platforms — WooCommerce, Klarna, Magento, and more.
- Hiring, training, and coordination; critical architecture decisions; hands-on development; cross-team project management.

Technical Lead · Consignor, Bucharest

2009 – 2017

Led the team behind 50 web services and 5 full-stack web applications serving 10,000+ business clients, distributed across Amazon Cloud.

- Key part of the entire application development workflow; designed many modules of the business software.
- Mentored junior and senior developers; wrote technical and user documentation; liaison between development and other departments.

C# · .NET, ASP.NET MVC · WCF · SQL Server Enterprise · JavaScript, jQuery, Bootstrap, LESS/SASS · Python, IronPython · AWS

Team Leader · TeamNet, Bucharest

2008 – 2009

- Managed the Optimus ERP modules through all development steps, from specification to testing and deployment.
- Planned new features with the design department; owned enhancement work and defect resolution with the Quality Department.

Game Programmer · Ubisoft, Bucharest

Jan 2005 – Jun 2008

- **Silent Hunter 4:** framework for Crew, Weapons, and Equipment evolution of the U-Boat simulator; Career module.
- **King Kong (PC):** Intel Viiv / Windows Media Center integration, multithreaded rendering, security module.
- **Blazing Angels (PC):** Save/Load system and Media Center shell. **Tom Clancy's FireHawk:** Enhanced Reality System module.

C++, STL · Software optimization · Linear algebra, calculus, probabilities

EDUCATION

Master of Science in Computer Science, Specialization in Project Management — Academy of Economic Studies, Bucharest (2000 – 2002)

Bachelor in Business Administration, Major in Computer Science, Specialization in Computer Science Applied in Business — Academy of Economic Studies, Bucharest (1995 – 2000)

SELF-LEARNING

Curiosity-driven mindset extending well beyond formal job requirements: independently built a solid conceptual foundation in machine learning, deep learning, neural networks, reinforcement learning, probability theory, linear algebra, calculus, and statistics — prioritizing core principles and deep intuition for how algorithms work under the hood. Hands-on experiments with Python, NumPy, Pandas, TensorFlow, and Matplotlib.
